

**General Information:** WB-25 when properly applied, will effectively coagulate and flocculate a wide variety of suspended solids.

**Using WB-25 with Fish:** Certain species of fish may be killed during application rates recommended on this label due to gill plugging. If the water to be treated is extremely turbid, extend the application time to reduce the larger particles plugging the gills. Allow sufficient time for the fish to move into untreated areas.

**Toxicological Information:** This product is an eye and skin irritant. Inhalation of mists may cause mild mucous membrane and respiratory irritation. Ingestion may cause irritation of the mucous membrane, esophagus, and stomach.

**How to Estimate Lake or Pond Size:**  
Measure length (L), Width (W) and average Depth (D) in FEET. Then multiply for:

Square shaped bodies of water:  
 $L \times W \times D \times 7.5 =$  approximate gallons

Circular or Elliptical bodies of water:  
 $L \times W \times D \times 5.9 =$  approximate gallons

Total gallons divided by 325,851.6 (gallons per acre feet) = Acre Feet
