Meras Water Solutions knows that prevention is the key to eliminate the risk of pathogens. Effective cleaning and sanitizing of potential risk areas is a critical step in making sure your business and operation can be productive.

As rules and regulations become more complex, the need for proper sanitizers has quickly become an essential part of any process. Meras aims to be proactive by providing sanitizers for all aspects of your business.

To ensure you are reducing the risk, let Meras help protect your operation, employees, and customers from the threat of pathogens. We have products that are EPA approved for sanitation and prevention maintenance, Kosher, and certified organic.

How we serve: Our knowledgeable team will help your quality assurance and safety personnel with application procedures and product selection.

Our product portfolio has a vast range of products and application methods for optimum coverage for every sanitation application.

INDUSTRIAL WATER TREATMENT AND SANITATION PRODUCTS FOR THE TREATMENT OF

- Cooling towers
- Evaporative Condensers
- Closed-loop systems
- RO pretreatment
- Liquid foaming CIP cleaners
- Water filtration and Ion-exchange

INDUSTRIAL SANITATION SOLUTIONS

Product	Description	Use	Packaging
PERASAN® A	Perasan A is a top of the line sanitizer for a variety of applications, comprised of 5.6% peracetic acid and 26.5% hydrogen peroxide. Perasan A is ideal for food contact surface sanitation, is non-corrosive to stainless steel, and has no harmful disinfection by-products.	Perasan® A is an ideal product for: <ul style="list-style-type: none"> • Reverse osmosis and ultrafiltration membrane cleaning and biofilm removal. • Control of slime and bio-fouling in Cooling Towers, Evaporative Condensers, closed-loop systems, and RO pretreatment. • Fruit and vegetable processing, beverage plants, wineries, breweries, meat poultry seafood. • No rinse required and does not contribute to taste, odor, or color. 	Liquid, foam, fog, 5, 15, 30, 55 & 300 gallons
PERASPRAY	This broad-spectrum one-step sanitizer, disinfectant, and deodorizer kills bacteria and viruses on hard non-porous surfaces and high-touch areas. Peraspray is chlorine-free and requires no post rinsing. This is an eco-friendly product that is not flammable and is composed of peracetic acid and hydrogen peroxide.	Peraspray is an ideal product for: <ul style="list-style-type: none"> • Bathrooms, kitchens, offices, supermarkets, institutions, and restaurants. • Meat and poultry operations, per areas, showers, casings, and cafeterias. 	Liquid, spray no rinse. quart bottles and 2.5, 5, 55, 320 gallon packs.
PERAFOAM™	A very high foaming concentrate specifically designed for use with Perasan A. This long lasting foam allows for longer contact on equipment and vertical surfaces for maximum benefit.	PERAFOAM is FDA-approved for use in federally inspected meat, poultry, and seafood plants. No rinse is required if used at the recommended dose rates.	Foam, spray
FOAM CHLOR 50	Foam Chlor 50 is a self-foaming chlorinated alkali cleaner designed for use through a mechanical foaming device. The foaming properties of Foam Chlor 50 allow operators to visually see where the product has and has not been applied for optimal cleaning. Besides, the product can be used as a spray cleaner, as a soak for detachable equipment parts, and COP cleaning.	The Foam Chlor 50 cleaner is approved for use in food plants by the USDA, uses only food-grade chemicals allowed by the FDA, and is Kosher certified.	Foam, spray, soak
FLOOR GUARD	Floor Guard consists of light density, air-dried beads that burst under the weight of a shoe or tire – immediately releasing its active ingredients – that coat and protect tires or shoes from contaminants. 100% biodegradable.	Floor treatment that is designed to relieve concerns of cross-contamination on floors in high traffic areas.	Broadcast beads, 25lb pail and 300lb drum.
FLOOR GUARD 2	Floor Guard 2 is a peroxygen-based product that is air-dried and low density. The weight of a shoe or tire will burst the bead, releasing the active ingredients and coating the tire or pump. Floor Guard 2 is a smaller particle size product compared to conventional Floor Guard products allowing it to enter more minor cracks and crevasses. This product is 100% water-soluble and biodegradable.	Floor Guard 2 is a unique Quat-Free beaded floor treatment and cleaner designed to eliminate cross-contamination on floors in production rooms, cool rooms, freezer, cold storage areas, and anywhere there is foot or forklift traffic.	Broadcast beads, 25lb pail and 30 gal open head drums.

Product	Description	Use	Packaging
SANI CLEAN	EPA approved quaternary ammonium-based disinfection cleaner for hard surfaces. This specialized cleaning compound removes dirt and oil from surfaces allowing the disinfection compound to eliminate harmful pathogens effectively. Sani-clean is an active, bactericide, fungicide, and virucide.	Sani Clean is ideal for food service establishments, hospitals, and food processing plants.	Mopped, sprayed, brushed on surfaces. 4 x 1 gal case.
MULTICHLOR	Multi-Chlor is a 12.5% sodium hypochlorite solution registered for a wide range of applications, including shocking and sanitizing. It is a sanitizer and cleaner for algae, slime, bacteria mold, fungi, and biofilm.	MultiChlor is recommended for sanitizing equipment and surfaces on dairy farms, in dairy plants, meat and poultry plants, food processing plants, breweries, and beverage plants. MultiChlor is also recommended for disinfection of potable water for home well water systems and for swimming pool chlorination.	Ask Meras representative.
CDG 300	CDG SOLUTION 3000™ liquid concentrate is EPA-registered pure chlorine dioxide. It's designed to control microorganisms in food and agricultural applications, drinking water, process water, piping systems, cooling towers, condensers and heat exchangers.	<ul style="list-style-type: none"> - Hospital potable water systems - Hotel & commercial potable water systems - Recirculating cooling water systems - Air washers and scrubbers - Food & beverage processing plants - Industrial pasteurizers - Heat transfer systems - Paper making machines - Agricultural applications - Oil & Gas production - Membrane cleaning - Many other clean water applications 	Ask Meras representative.
OXYDATE 2	Oxy-Date 2 is a high-quality industrial low-foaming cleaning powder and oxidizing supplement to sanitation procedures. This product contains ingredients that are either GRAS or for incidental food contact.	Sodium Sulfate, Triacetin, Sodium carbonate, Sodium percarbonate	Dry ingredient, diluted 35lb. pails, 100 lb. drum
ENVIRO BAC 2	Enviro Bac 2 is an EPA approved high quality, high dilution, 10% quaternary sanitizer/disinfectant, and mildew stat.	EnviroBac 2 used in dairies, hospitals, hotels, schools, produce plants, poultry, and meat plant operations. Enviro Bac 2 is effective against, Human Coronavirus, E. coli, Avian influenza, Salmonella Typhi.	4 x 1 gal cases, 5 gal pails.
HAND SANITIZERS			
BACSTOP 2	Bacstop 2 is a high-quality pH balanced antibacterial hand soap.	Active Ingredient	Liquid, 2x 1 gal, 4 x 1 gal case, 5 gal pails
BACSTOP 3A	This premium pH-balanced rinse-free hand sanitizer exceeds FDA/ USDA efficacy guidelines for hand sanitizer and antiseptic hand treatment.	Active Ingredient 65% Ethanol	Liquid, 4 x 1 gal case, 55 gal
